PROFESSIONAL SUMMARY

Results-driven **Frontend Developer** with **3+ years** of production experience at **Kyndryl India** the world's largest IT infrastructure provider delivering enterprise-grade **React.js** applications used by **20+ person operations teams**. Reduced page load times by **25%**, cut design-to-production cycles from **5 days to 2 days**, and built a **reusable component library** adopted by **4 internal teams**. Proficient in **TypeScript**, **Redux Toolkit**, **Kibana**, and **Figma-to-code** workflows. Currently exploring **Next.js** and **Node.js** to expand **full-stack development** capabilities and build scalable, end-to-end web applications. Seeking a high-impact **Frontend Developer** role in a **product-focused** environment.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Redux, Redux Toolkit, Context API, Tailwind CSS

UI/UX Design: Figma, Wireframing, Prototyping, User Flows, Responsive Design

Data Visualization: Kibana, Elasticsearch (Dashboards, Charts, Data Insights)

Testing & Performance: Lazy Loading, Code Splitting, React DevTools

Backend & Cloud (Exposure): Python, SQL, REST API Integration, AWS, Microsoft Azure

Tools & Version Control: Git, GitHub, Vite, Webpack

PROFESSIONAL EXPERIENCE

Software Developer – Frontend

08/2022 – Present

Kyndryl India

- Engineered responsive, accessible web applications using **React.js**, **JavaScript (ES6+)**, and **Tailwind CSS**, reducing average page load time by **25%** across **3 enterprise dashboards**.
- Architected a reusable component library of **12+ React components** using **Hooks** and functional patterns, adopted across **4 internal product teams** at Kyndryl, cutting development time for new features by **20%**.
- Built interactive monitoring dashboards using **Kibana** and **Elasticsearch** with custom filters, time-series charts, and drill down views, reducing incident response time by **40%** for a **20 person operations team**.
- Implemented state management across complex application flows using **Redux Toolkit** and **Context API**, reducing prop-drilling and improving component re-render efficiency.
- Led **Figma-to-code** handoffs for **5+ features** in collaboration with the UX team, reducing UI revision cycles by **30%** and decreasing design-to-production time from **5 days to 2 days**.
- Participated in **Agile sprints (2-week cycles)**, contributing to backlog grooming, code reviews, and daily standups using **Git/GitHub** for branching, PRs, and version control.

PROJECTS

AIOps Platform (React.js · Node.js · JavaScript)

- Built an enterprise AIOps application using **React.js** and **Node.js** to monitor IT infrastructure, visualize operational data, and provide a responsive interface for incident management.
- Integrated **REST APIs**, developed reusable **UI components**, and optimized **frontend performance** to deliver a scalable and user-friendly application in an Agile development environment.

Component Library & Design System(React.js · Tailwind CSS · Storybook)

- Developed 12+ reusable UI components** (forms, modals, tables, notifications) following **atomic design principles**; documented in **Storybook** and adopted by **4 internal teams**
- Standardized button, input, and card patterns** across **product lines**, eliminating **inconsistent UI** and reducing **cross-team design debt**.

REST API-Driven Web Application(React.js · REST API · Redux Toolkit)

- Built a dynamic data management application consuming **3 third-party REST APIs** with **full lifecycle management**, including **loading skeletons**, **error boundary fallbacks**, **pagination**, and **real-time refresh**.

- **Implemented debounced search and lazy-loaded routes**, reducing **unnecessary API calls by 35%** and improving **perceived performance**.

Enterprise Operations Dashboard(Kibana · Elasticsearch · React.js)

- Designed and built a **real-time monitoring dashboard** tracking **8+ operational KPIs**, used daily by a **20-person operations team** for **incident triage** and **root cause analysis**.
- Implemented custom Kibana visualisations with **dynamic filters**, date-range selectors, and **alert thresholds**, reducing **average time-to-insight by approximately 40%**.

EDUCATION

Basaveshwar Engineering College

Bachelor of Engineering in Information Science, CGP- 7.92

08/2022 | Bagalkot, India

CERTIFICATES

- Microsoft certified: Azure AI fundamentals
- Certified AI Engineer Building and Leading AI/ML Projects and Products.
